

6.894: Interactive Data Visualization

A Tour through the Interaction Zoo

Arvind Satyanarayan

A graphic is not “drawn” once and for all; it is “constructed” and reconstructed until it reveals all the relationships constituted by the interplay of the data. The best graphic operations are those carried out by the decision-maker [themselves].

Jacques Bertin (1918 – 2010)
French cartographer

Gulf of Evaluation

The level of difficulty in interpreting the system and assessing if goals were met.

User Goals

Data

Gulf of Execution

The gap between the user's goals and their ability to achieve them using the system.

- ✗ Results returned as a table.
- ✗ No hint on how to reformulate query.
- ✗ Slow question-answer loop.

Gulf of Evaluation

User Goals

SQL

Data

Gulf of Execution

- ✗ A rigid syntax designed by/for programmers.
- ✗ Difficult to do "fuzzy" matching.

- ✓ Visual representation of objects + actions.
- ✓ Immediate + continuous display of results.

Gulf of Evaluation

User Goals

Direct Manipulation

Data

Gulf of Execution

- ✓ Physical actions or labeled buttons instead of complex syntax.
- ✓ Rapid, incremental, and reversible actions.

The screenshot shows a web browser's developer console with the following content:

- Navigation tabs: Elements, Console (selected), Sources, Network, Performance, Memory, Application, and a menu icon.
- Location: top
- Filter: All levels
- Code input: `> var canvas = document.querySelector('canvas');`
- Output: `< undefined`
- Code input: `> var ctx = canvas.getContext|`

Interaction with Visualization

Select – identify something as interesting.

Connect – show me related items.

Abstract/Elaborate – show me more or less detail.

Filter – show me something conditionally.

Reconfigure – show me a different arrangement.

Explore – show me something else.

Encode – show me a different visual representation.

Point Selection

Select discrete data values.

Point Selection

Select discrete data values.

How many points are selected? 1, 2, 3, ...

Point Selection

Generalized Selection via Interactive Query Relaxation

Jeffrey Heer | Maneesh Agrawala | Wesley Willett
University of California, Berkeley

Connect

Brushing & linking: selection is called a "brush", and the selected data is shown ("linked") in other views.

Link by *tuple* (i.e., explicitly identify and match the same data values across every view).

Connect

Link by *query* (i.e., matching range or values of fields).

Type of linking operation is not dependent on selection type (i.e., point and region selections can both be used to link by either tuple or query).

How the Tax Burden Has Changed

Most Americans paid less in taxes in 2010 than people with the same inflation-adjusted incomes paid in 1980, because of cuts in federal income taxes. At lower income levels, however, much of the savings was offset by increases in federal payroll taxes, state sales taxes and local property taxes. About half of households making less than \$25,000 saved nothing at all. [About the Data »](#) | [Related Article »](#)

- \$0-25k

Daily stock prices in 8 year data sets

(a) Head-and-shoulders in Amazon stock prices, 150 days 10/99 to 3/00

(b) Inverted head-and-shoulders in Alaska Air Group stock prices, 108 days 08/98 to 12/98

(c) Cup-with-handle in Amazon stock prices, 95 days 7/99 to 11/99

Monthly Insurance Equity from the Central Bank of Iceland

(d) Rounded-bottom, 304 days from 11/08 to 9/09

Hourly bit traffic in the UK academic network backbone 11/19/04 to 01/27/05

(e) Falling peaks: a six day decrease in traffic before 12/25/04 (Christmas)

(f) Seven peaks: Low traffic from 12/26/04 to 1/3/05 (Christmas to New Year's Eve)

Electrocardiograms (ECGs) from MIT-BH ST Changes, 10s data sets with measurements every 3-5ms

(g) Sharp rise: An ECG anomaly lasting 650ms in record 302

(h) Sharp dip: An ECG anomaly lasting 525ms in record 301

[Mannino and Abouzied. Qetch. CHI, 2018]

Reconfigure

[Mike Bostock. April 2012.]

Order:

This matrix diagram visualizes character co-occurrences in Victor Hugo's *Les Misérables*.

Each colored cell represents two characters that appeared in the same chapter; darker cells indicate characters that co-occurred more frequently.

Use the drop-down menu to reorder the matrix and explore the data.

Built with [d3.js](#).
