

# **An Extensible Visualization Library** for Screen Reader Accessibility

Matthew Blanco blanco.m@northeastern.edu

Jonathan Zong jzong@mit.edu

Arvind Satyanarayan arvindsatya@mit.edu

### **Accessible Visualizations**

require implementations that are not re-usable across toolkits, and lack standardized user experiences.

## **Olli is**

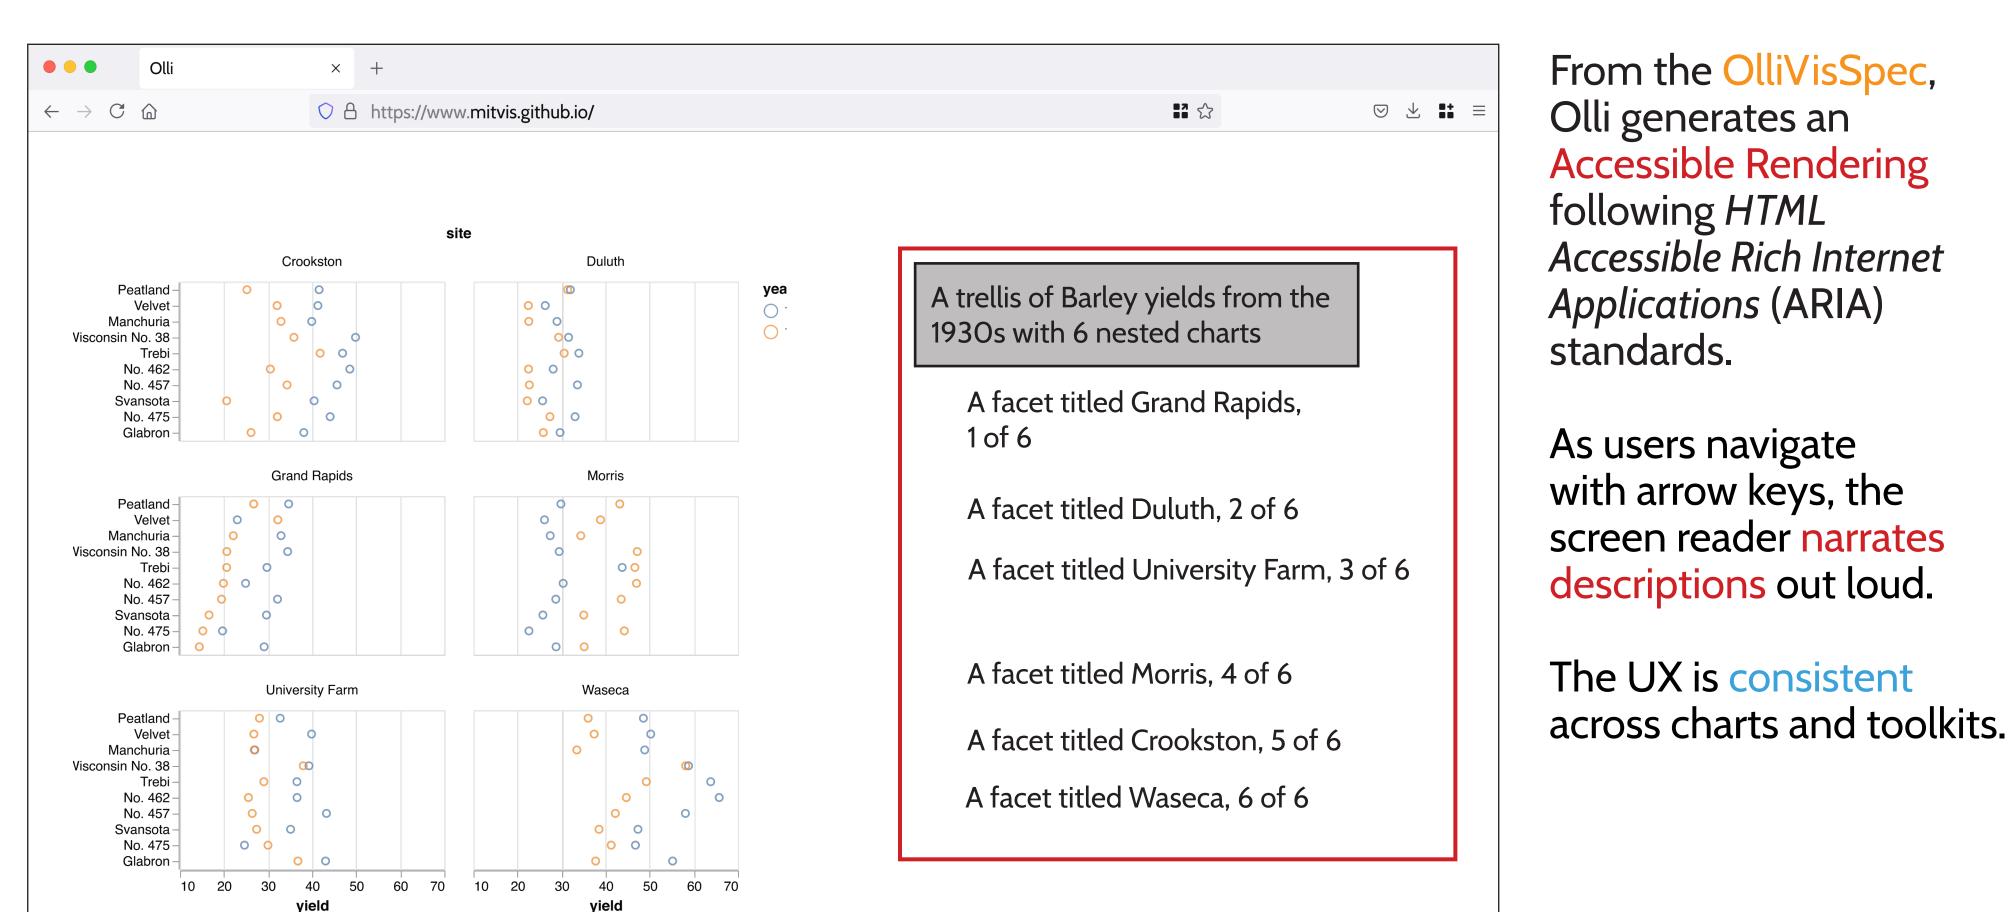

an open-source Javascript library that converts existing visualizations from many popular toolkits into standardized, accessible user experiences

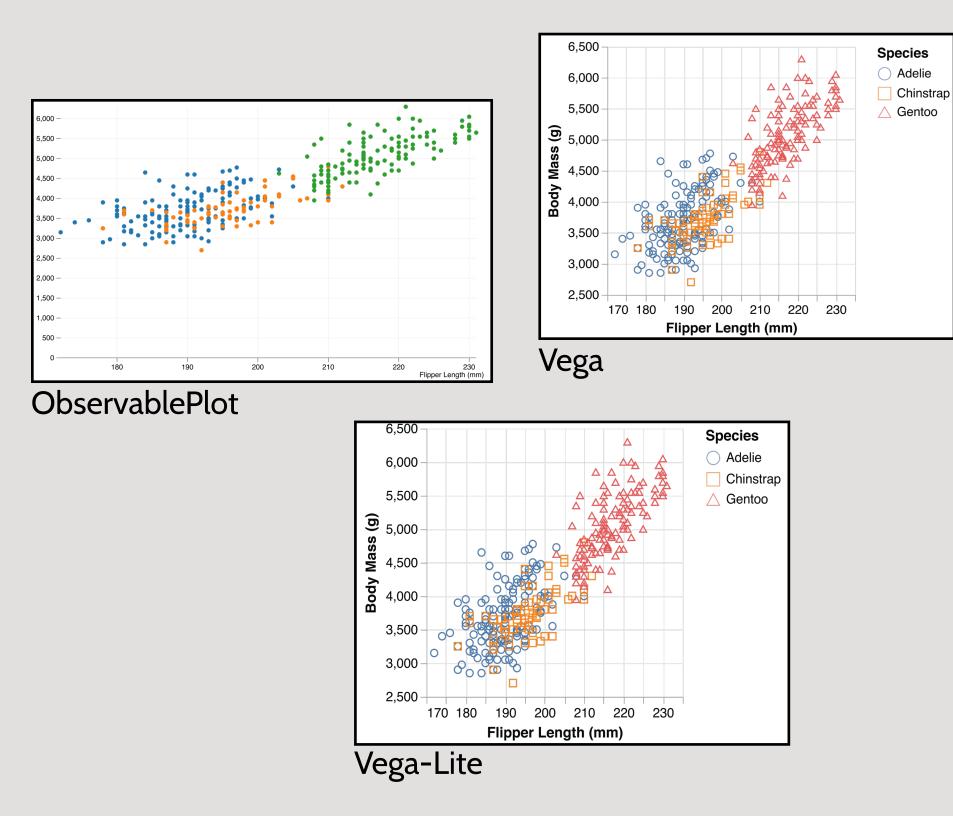

### **Creating an Accessible Visualization**

Visualization specifications are passed into an Olli adapter to generate an OlliVisSpec.

### **Extending Olli to Support Additional Toolkits**

**Supported Chart Types** 

Olli encourages reusability through an adapter design pattern with a simple interface.

\* Interface describing how a visualization adapter should be created export type VisAdapter<T> = (spec: T) => Promise<OlliVisSpec>;

> Olli includes built-in adapters for Vega, Vega-Lite, and Observable Plot.

A scatterplot showing body mass and flipper lengths of penguins. with 2 axes and 1 legend

> Y-Axis for a quantitative scale with values from 2700 to 6300

X-Axis for a quantitative scale with values from 172 to 231

> Range 170,180, 8 values in the interval

Range 180,190, 70 values in the interval

. . .

Legend titled 'Species' with 3 values

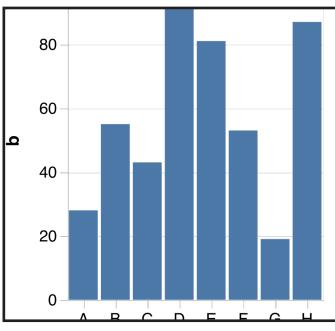

Grid view of the data

Toolkit developers can extend Olli while re-using its accessible renderer.

#### Bar Charts

40

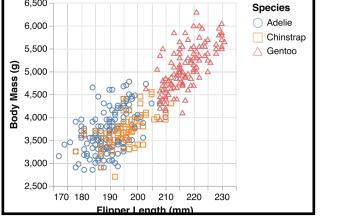

41

A simple bar chart with embedded data. with bottom axis

X-Axis for a nominal scale with values from A to H

Scatterplots

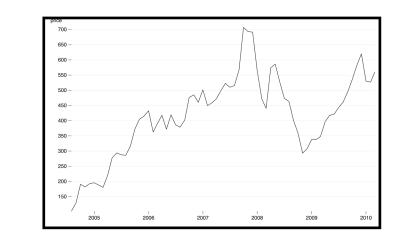

A scatterplot showing body mass and flipper lengths of penguins. with 2 axes and 1 legend Y-Axis for a quantitative scale with values from 2700 to 6300

X-Axis for a quantitative scale with values from 172 to 231

Legend titled 'Species' with 3 values

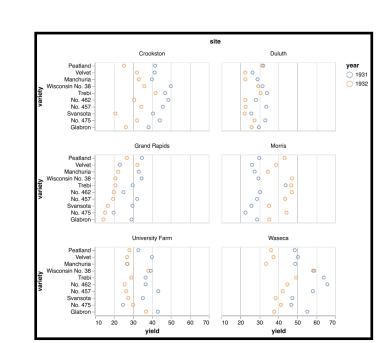

Grid view of the data

#### Line Charts

Google's stock price over time. with 2 axes Y-Axis for a quantitative scale with values from 102.37 to 707

X-Axis for a temporal scale with values from Aug 1, 2004 to Mar 1, 2010

Faceted Charts

A small multiples view of barley yields by site and variety. with 6 nested charts A facet titled Grand Rapids, 1 of 6 A facet titled Duluth, 2 of 6 A facet titled University Farm, 3 of 6

A facet titled Morris, 4 of 6

A facet titled Crookston, 5 of 6

A facet titled Waseca, 6 of 6

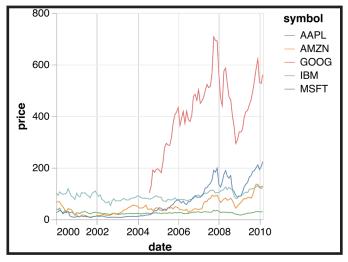

#### Stacked Bar Charts

#### site Crooks Duluth Grand I Morris Univers Waseca *l*anchuri 200 300 400 500 Sum of yield

A horizontally stacked bar chart of barley yields with left axis and 1 legend

> Y-Axis with values from Glabron to Wisconsin No. 38

Legend titled 'site' with 6 values

Multi-Series Line Charts

Stock prices of 5 Tech Companies over Time. with 5 nested charts

A facet titled MSFT, 1 of 5

A facet titled AMZN, 2 of 5

A facet titled IBM, 3 of 5

A facet titled GOOG, 4 of 5

A facet titled AAPL, 5 of 5
